

DocBox Launches New Features at HIMSS 21 Las Vegas

WALTHAM, MASS. – July 27, 2021 – Doc Box, the Clinician Assistant in Critical Care™ will be featured at the HIMSS 21 Global Health Conference & Exhibition, August 9-12 in Las Vegas.

The value of the healthcare industry's only vendor-neutral medical IoT platform that helps reduce medical errors by supporting multiple devices from various vendors at the ICU bedside and automates documentation workflow, giving ICU nurses up to 70% more time to dedicate to patient care.

Meet our team at the Palazzo Suite to show you how DocBox is the enabler to unify the internal data infrastructure healthcare systems require to improve patient safety and quality care while providing attractive ROI. Observe how The Clinician Assistant can reduce revenue cycle time by enhancing ICU cost capture and generate incremental revenue by increasing medical device utilization rates.

The personal or virtual demo will walk you through the value of our solution that can expand on remote critical care, new medical devices, and third-party applications. Get to know our new interactive dashboard for operational and clinical intelligence.

Experience how DocBox, the Clinician Assistant in Critical Care automation and siloed data integration can solve ICU complexity and increase patient care.

We look forward to your visit in our Suite at the Palazzo Las Vegas.

August 9 to 12, 2021
